The commodities for which the price levels are computed are those in every-day consumption.

**Wholesale Prices.**—During the September quarter the general level of wholesale prices dropped by 5 per cent. Prices of meat were the main factor in the movement during the quarter; they fell by 5·5 per cent. in July, by 6 per cent. in August, and by 20 per cent. in September, when the index number of the group was lower than in any month since December, 1913, the total decrease during the three months being 29 per cent. The fall in prices was greatest in the group wool, cotton, etc., and dairy produce; groceries, metals, and building materials showed very slight variation. Of the hundred commodities used in forming the index numbers, 40 commodities remained unchanged during the quarter, 25 increased and 35 became cheaper, the decrease being substantial in the case of meat, bran, pollard, galvanised iron, barbed wire, lead and galvanised hoop iron.

**Meteorology.**—The outstanding features of the weather during July were two cyclonic storms over the north-east and coastal areas, both attended by south to east gales, with very heavy rains, which caused extensive damage. The rainfall was above normal over the north-eastern half of the State, but elsewhere it was below. During August cold and bleak weather was experienced, with strong west to south-west gales. There was a heavy and extensive fall of snow on the highlands, and rain was general over most of the State, but it was below the average. In September the rains were moderately heavy, and accompanied by some thunderstorms and hail. The month's rainfall generally was above the average. During the second half of September there were periods of warm weather.

The deaths in September quarter numbered 2,483, namely, 1,315 males and 1,168 females. The mortality rate of 10·96 per 1,000 of population per annum is 9 per cent. below the quinquennial rate for the September quarter. The deaths were below the average in all age-groups.

The infantile mortality (deaths under 1 year) was 55·3 per 1,000 births, and is 17 per cent. below the average for the September quarter of the previous five years.

\* From 25th March, 1916, to 31st January, 1919, the official f.o.b. price of wheat for flour for home consumption was 4s. 10½d. per bushel. This included 3½d. handling and commission charges; but city millers, handling grain for their own mills obtained it for 1½d. per bushel less than the f.o.b. price, so that the price of wheat for flour for home consumption was 4s. 9½d. per bushel (on trucks), Sydney. On 1st February, 1919, the price was raised to 5s. per bushel, and to 5s. 6d. on 1st October, 1919, to 6s. 6d. on 3rd January, 1920, to 7s. 8d. on 31st January, and to 8s. 10d. on 12th February, 1920, for old seasons and imported wheat. Gristing of new season's wheat, 1920-21, began about 15th November, 1920, the price at the mill being 9s. per bushel.

## No. 69.—New South Wales Wheat Areas, 1921.

The following estimate has been based upon reports received from Wheat-growers throughout the State. The total area sown was 3,684,000 acres, of which 3,233,000 acres are to be cut for grain and 451,000 for hay.

As compared with the area sown in 1920, there was an increase of only 26,880 acres, or '74 per cent.

Owing to a succession of rainstorms in the late autumn and early winter over a considerable area of the State, ploughing operations were retarded, and reports from the various districts state that the area ploughed would have been greater but for the continued wet weather, which caused late sowings on reduced areas. The prospects for the harvest are, however, most encouraging.

In the principal wheat-growing divisions, with the exception of the Central Western Slope and the Riverina, the area sown has been increased since last season. The former district showed a reduction of 12,000 acres and the latter of 35,000 acres.

In 1920 wheat was grown on 17,546 holdings; in the current season 18,284 growers have furnished returns, an increase of over 700, or of 4·2 per cent.

The following table gives a summary of the areas in each of the principal divisions in comparison with the actual returns of the previous year :—
